# INDIA BASIN PARK 2024-2028

*"India Basin will transform an abandoned industrial site into an important community space that will serve Bayview residents and visitors from across the Bay Area. I want to thank Rec & Parks, the numerous community organizations, and Bayview residents for their hard work to make this plan a reality."  
Mayor London Breed 2018*

*"We are very excited to engage in the work of restoring the community through restoring and healing the land alongside our partners at the San Francisco Recreation and Park Department. We are providing career pathways for some of our community's residents who have been most impacted by environmental pollution, thereby becoming the change we wish to see in the world."  
Lena Miller Hunters' Point Family (2018)*

*"Coming from Texas to work at the Shipyard during WWII, it's incredible to create and contribute art in the community I first called home in California. This park will bless so many lives when it's here; because fresh air, space and recreational activities are vital for our communities. I'm inspired by all of what this park will mean for us in the Bayview and wanted this mural to show that."  
Ira Watkins, Artist*

*"As our City continues to grow, we are committed to the sustainability of our City by making investments in parkland that enhance our world class waterfront. I'm pleased with the progress of the India Basin Waterfront that ensures a legacy for future generations to come."  
Former Mayor Ed Lee (2016)*

*[T]his is a very important project, it's a special one that I think that [sic] should happen, and ultimately what we're looking for is the future of the young people that live in the community, that participated in the workshops, that care about climate change adaptations along that shoreline, and that care about protecting their community...We'd love to see this go forward."  
Jackie Flin APRI (October 1, 2018)*
